

Disposable Spirometer Mouthpieces

FDA-Compliant, Eco-Friendly
Breathing Tubes

Paramount Tube offers a comprehensive line of eco-friendly, disposable spirometer breathing tubes. Our breathing tubes are made with recyclable paper, not wasteful single-use plastics or other non-biodegradable materials.

Compatible with numerous medical devices, including:

- Spirometers
- Peak flow meters
- Pulmonary function testing equipment

Engineered to be strong, durable and have a snug fit that optimizes their functionality.

Paramount's paper mouthpieces are cost-effective and available in a range of convenient package sizes that fit all common brands of pulmonary function equipment:

- 0.732" to 1.250" internal diameter
- 2.00" to 3.250" long
- Custom sizes available upon request

The best option for medical practitioners looking for a more sustainable solution.

Unique in our industry, our process replicates the look, feel, and strength of plastic breathing tubes with paper materials. And our FDA compliant material resists moisture, so no sticky lips!

They are available in custom colors for easy identification and with custom printing/advertising logos on tubes.
